

FEATURES OF AN EXCELLENT LESSON PLAN

Meyliqulova Zarina

Key words: Lesson plan, learn, methods, analysis, features, organize, skill, innovative.

Аннотации: В этой статье рассказывается, как организовать мастер-классы и его особенности. Кроме того, информация о них дана с примерами.

Annotation: This article describes how to organize master classes and its features. In addition, information about them is given with examples.

Annotatsiya: Ushbu maqolada mahorat darslarini qanday tashkil etish va uning o'ziga xos xususiyatlari haqida yozilgan. Bundan tashqari ular haqida ma'lumotlar misollar bilan keltirib o'tilgan.

Introduction: The law deals extensively with the teacher's skills and how to organize the lesson. Initiative, skill, interest, aspiration, innovative ideas are required from every teacher requires working with.

Research Methods: Many shortcomings of the traditional method of teaching have not disappeared yet. For example, the elements of memorization are still stored without realizing their meaning during the course of the lesson. Many teachers have matured by illuminating the economic, social and spiritual life of the present time they do not pay attention to the analysis of the rest of the problems, because the student has the most of the material they require memorization of important parts. Such teaching should be avoided. A new quality to the organization of the educational process should approach. That's why there is a new one aimed at eliminating formalism in school ideas, constructive situations are waiting with great attention from the pedagogical community is being taken. When talking about this, first of all, it is appropriate to talk about pedagogical cooperation.

The authors of such pedagogical cooperation are teacher-innovators V. F. Shatalov, Ye. N. We can talk about Lisenkova, P. I. Volkov, M. P. Shetinin and others. Pedagogical it will be much easier if it is worked based on the cooperation methodology. I am a teacher

here the children are calm, they trust each other, it is easy for them, and the teacher is happy. We are familiar with the work of creative laboratories of innovators based on pedagogical cooperation.

The teacher has an important task of involving students in the general work of education stand up Pedagogical cooperation is based on previous pedagogy, teacher and is characterized by the fact that it is built on the basis of the student's joint work. With students The essence of the innovative approach is the change of social conditions requires adequate changes in the education system. According to V. I. Juravlev, cooperation pedagogy is not only about relations, but also about the structure of cognitive operation, collective knowledge.

To work alone to be the best partner as well requires. Remembering the knowledge that should be mastered with the knowledge acquired before the lesson begins with repetitive reinforcement. This means tomorrow through the topics covered to prepare for the topic. Strengthening the coverage of a new topic with the help of various exercises, the lesson ends with concluding, summarizing, evaluating, assigning the task.

Results: Active or inactive students in the lesson, how the teacher organizes the lesson depends. In order to increase the efficiency of students' knowledge in the lesson, we will discuss a new topic it is recommended to divide into pieces. By giving different problems and miosols and checking how well the lesson is mastered the goal is achieved. Asking and repeating the passed topic and determining the knowledge levels of the new topic their evaluation and preparation for new materialization. Teacher to save time it is good if he hangs the terms, expressions, and formulas related to the new topic on the board in advance will be. Also, pose a verbal question or problem representing the new lesson topic is done through question or problem situation is interesting for students, it should be surprising and attention-grabbing¹.

Covering a new topic - dividing the topic of the lesson into small parts, sequentially and in a logical connection, if necessary, depending on other subjects, they are demonstratively different should be given using teaching methods. The ability to manage students' activities during the lesson depends on many factors. The most important thing is to make the subject interesting to the students. Scientists say that interest is a function of all mental processes and functions of a person, perception, has a positive effect on imagination, attention, character, thinking.

A well-designed lesson plan: Helps students and teachers understand the goals of an instructional module. Allows the teacher to translate the curriculum into learning activities. Aligns the instructional materials with the assessment.

A lesson plan is a scheme or set of actions designed to achieve a specific goal, be it work, personal, group, academic, among others.

People rely on lesson plans for a variety of reasons, including because they offer the ability to create and organize a set of activities or steps to be taken, determine what the priorities are, and determine the schedule by which the plan must be made to achieve the goal.

Because a lesson plan is a tool, it can be considered a strategy that facilitates project development, especially because it allows tasks to be performed in a consistent order from the simplest to the most complex as they move forward.

Should have 6 components of an excellent lesson plan

Objective. A lesson objective can be one of the most important components of a lesson plan. ...

Materials. If you prepare the materials ahead of the lesson, you may have more time to focus on teaching. ...

Background knowledge. ...

Direct instruction. ...

Guided teaching. ...

Closure and assessment.

And should have 5 main characteristics of an Effective an excellent lesson Plan
Builds upon Students' Prior Knowledge. When planning for lessons, most of us focus tremendous effort on the content we will teach. ...

Clarifies Transitions. ...

Allots Time For Students' Involvement. ...

Prompts Teachers to Reflect.

For primary classes after the independence of our republic new programs and textbooks were created. To analyze a work of art in study programs. More importance is given to different types of tasks related to working on the text, technique more attention was paid to the use of tools. Ancient customs of children, historical-national education on the basis of values, formation of their worldviews, the most characteristic of people.

Ideas such as inculcating good qualities are mostly concentrated in the works they read. Must In fact, to ensure the unity of education and upbringing, to allow children to work safely and freely effective results can be achieved through encouragement. The purpose of education is to give students the world if it is to inculcate knowledge and skills suitable for their standards, the purpose of tirbia is to teach children introduction to life a person's happiness due to work, laziness, laziness explaining that it will lead to bad consequences.

One of the important aspects of reading lessons is to make children highly religious, spiritually mature, is to educate them so that they can feel responsibility. These qualities to the younger generation. The teacher's skill and creative activity are important in teaching. Them, first of all, to awaken the feeling of friendship, camaraderie, always striving to do good deeds allows children to reach their full potential. Children are sophisticated in reading lessons special attention is paid to their maturity. To read with interest and listen to the content of some texts to children recording and broadcasting on magnetic tapes to influence their reception activity activates.

The rules for giving a subjective assessment in concrete material are of great theoretical and practical importance for the methodology is important. To fully fulfill and implement the program requirements, first of all it is necessary to acquire and improve reading skills correctly and carefully.

Reading skills are formed in the process of teaching literacy, at the next stages of education will improve. The qualities of reading skills include reading the text of an artistic work correctly, quickly, consciously and includes expressive reading. Students' reading skills are formed in reading classes and will be improved. The qualities of reading skills are interrelated, and the main one is conscious reading is considered: when the student reads the text quickly and correctly, but does not read with understanding or his speed if others do not understand the content of the text as a result of his reading, if he reads correctly or reads too slowly, speech.

If you do not pay attention to the pauses between the units, the idea expressed in the text will not be understood. Reading at a certain speed and correctly serves conscious reading; and reading correctly, quickly and consciously is the basis of expressive reading. Acquiring reading skills is all that is taught in school is an important condition for successful learning of subjects. Reading is an activity is the main type, developing students ideologically-politically, intellectually, aesthetically and verbally creates a great opportunity for This process is to develop and improve reading skills. Requires systematic and purposeful work on development. Acquisition of reading qualification. It is very complicated and takes a long time to form. Psychologist T. G. Yegorov his book give information divides the process into three stages: analytical stage, synthetic stage and automated stage.

The analytical stage corresponds to the period of literacy training, in which the analysis of the word by syllables and letters the skill of making and reading in syllables is formed. Reciting the word for the synthetic stage has a character; in this case, the perception of the word by sight and its pronunciation is the understanding of the meaning of the word is basically compatible with Reading is done by understanding the meaning

of words. Pupils they pass to the synthetic stage in the 3rd grade. In the following years, learning will become automatic.

Discussion: Work on the work in reading classes should be organized in such a way that the work content analysis will be directed to improving reading skills. It is about everything in the formation of students' behavior and training of their will the given examples should affect them, excite them, and make them happy. One of the important aspects of reading lessons is to make children highly religious, spiritually mature, is to educate them so that they can feel responsibility. These qualities to the younger generation The teacher's skill and creative activity are important for instilling. In them, first of all, to awaken children's sense of friendship, camaraderie, always striving to do good deeds allows them to fully mature. In the reading lessons, the children are mature special attention is paid to their findings².

The content of the concept of pedagogical skills can be explained as follows: High level of culture, knowledge and intelligence high index. He has excellent knowledge of his subject. Knowledge in the field of pedagogy and psychology that he has mastered it thoroughly, and that he can use them in his professional activities. Perfect knowledge of educational methods.

Pedagogical skill system is related to each other consists of the following main components: Obedience to the requirements of pedagogical humanitarianism. Perfect knowledge of professional knowledge in connection with other disciplines. Having pedagogical skills. Mastering the secrets of pedagogical techniques. Among all professions, the teaching profession has a special and important social importance. After all, a teacher is a memory of the soul of the young generation, a person who gives education and training to young people. Today's in the day, it is not a good thing - politically, nature, society, laws of social life, development of thinking he teaches, in preparing for work and

² Abdullayeva Ch.F. Darsni tashkillashtirishda o'qituvchining mahorati-2023

mastering the secrets of the profession socio-economic that is important for society solves the situation.

Conclusion: Almost all works presented in the textbook help to educate students in this spirit will give. This is the responsibility of the teacher and his profession to be a skilled master, having an educational effect on students, and their interests, abilities, talents, beliefs and practical skills to be the owner of a profession that looks for ways of lateral development requires. For this, teachers' professional skills, improving their skills and qualifications, providing them with comprehensive care humiliating, creating necessary conditions, necessary material and scientific providing methodical and technical support, creativity of teachers it is necessary to help to regularly increase initiative. Based on this, the science of "Pedagogical skill" serves to train skilled teachers, it is a science that teaches the secrets and skills of professional activity of teachers and educators and provides information about its improvement. teaching teachers the essence of pedagogical skills, the ways, means, and forms of developing their professional activity within the requirements of the present timsystem. rns Pedagogical skills are improved during the pedagogical activities of teachers.

Regarding the child who did not understand the essence of the pedagogical process a teacher who is not deeply respected educational efficiency and a person will not have an idea that ensures perfection. The task of the pedagogical process is to impart knowledge, to educate, to develop, and it determines the criteria of the teacher's activity. Activities of teachers is a means of action of the pedagogical process. Subjects of the pedagogical process - parents, teachers, educators, class team, pedagogical team - are responsible for the subject of the pedagogical process, students and groups of students, and individual students, and they are responsible for the needs of the society. They carry out educational and training activities. 0 is a positive result of the teacher's pedagogical activity it is determined by his ability to achieve results, work skills, i.e. how well he can apply the acquired knowledge in his life and practical activities. For effective pedagogical activity of teachers system of necessary skills: knowledge, ability to understand the child,

observation composure, speech skills, organization, ability to see the future, focus, assess the situation correctly, eliminate all possible conflicts in a timely manner, make students interested in learning. From the first steps towards independence of our country, the great to build and improve our character, to improve the national education system, to strengthen its national soil. time world standards and skills based on harmonization with requirements.

In order to bring it to the level of education, great creative works are being carried out in the education system. After each work, there are questions, assignments, proverbs and words of wisdom for children is important for listening to their meaning, in their daily work, life activities helps to apply, to work in accordance with them.
