Abstract: *This article is about using innovation technologies in learning and teaching English and teachers` creativity, responsibilities, implementing new methods, making the lesson interesting and lively.*

Key words: *innovation, technology, effectiveness, specializing, Mass Media, telecommunication.*

Nowadays, the importance of learning English is more important in Uzbekistan than before is becoming much higher. A number of English language experts learn English they are applying new methods and ways to life. This is definitely teaching foreign languages increases efficiency. A lot of teaching using technology has its own advantages. In addition, it greatly improves the effectiveness of the education system increases and, in turn, makes the student who is learning the language keep up with the times and advance they help to strive. Technology is slowly replacing traditional teaching is occupying Today, many TV programs teach English new helpful programs and shows are being broadcast regularly. It should also be emphasized that the effectiveness of teaching today should be improved for the use of new modern innovative technologies in Uzbekistan methods were introduced. For example, a foreign language is taught on the basis of multimedia development of four skills in the student, both by viewing and through interesting materials there was an opportunity to learn by listening. In addition, the student sees live actions can guess the meaning of some words and tries to understand it.

Of course every how to use modern technologies such as computer, radio, CD, DVD in foreign language lessons advancing the educational process and teaching foreign languages faster to the young generation allows learning The use of technologies by some

teachers during English lessons lack of knowledge and lack of use leads to some boredom of students. For this very reason, that is, during the lesson, in order not to extinguish the enthusiasm of the learner the use of technologies and at least the computer increases the student's interest further ensures its progress. After all, the learner's age, interest, ability, educational materials prepared depending on the mastery of the lessons will definitely be effective. On the contrary, if we teachers do not choose educational materials based on these requirements, video films with complex words for elementary school students, if we broadcast songs or texts or show them through multimedia, computers, a study consisting of very simple texts for middle and high class or group students when we presented the materials, the pupils were eager to learn the language their interest gradually fades and they don't learn the lessons. And this is in turn, the decrease in grades, the teacher's self-esteem in front of the students can lead to loss.

So, it follows that technology is only useful during the lesson not, but the student is able to apply them in their place and use technologies. The main task is to ensure that it serves to increase knowledge. Current CEFR ie According to the requirements of international European educational standards, four: (writing, reading, listening, speaking) competences of writing, reading, listening and speaking in English efficient and appropriate use of technologies during the lessons is important. For example, play audio texts in listening comprehension lessons also has its own rules. The main goal is that the learner is listening it is important to be able to understand the audio material and analyze it without difficulty. Of this First of all, it is necessary to prepare the environment for broadcasting the audio material the listeners should provide a peaceful environment, and the teacher should provide the audio that is being played attention to the quality and sound performance of the amplifiers and that pre- and post-audio exercises are available and students should be provided with handouts.

After all the requirements have been fulfilled, the teacher will play the audio material can start broadcasting to students. Broadcast at least twice otherwise language learners will not understand the topic and audio material they may not be able to perform the exercises correctly after listening. Also teaching using technology in speaking and writing in the process, using multimedia, showing videos - films, clips to students making and

discussing it is a very effective way. To the students familiar vocabulary is used, new and complex words are included in the words commenting, video material after completing exercises related to new words can be demonstrated. To carry out this process, of course, it is quiet and noisy environment, comfortable and clean classroom, everyone has the opportunity to watch it is important to check that the sound amplifiers are working.

After our country gained independence, interest in teaching foreign languages increased and many opportunities were created for young people. Our first president is Islam Karimov as they said, "Currently teaching foreign languages is of great importance in our country is being given. This is certainly not for nothing. Today, the world community has a place it deserves for our countries seeking to occupy, in solidarity with our foreign partners, perfect foreign languages for our people who are building their great future in cooperation there is no need to estimate the importance of knowing".

In accordance with these requirements, classrooms have stands and new information was equipped with communicative techniques. The demand for learning a foreign language is increasing is increasing day by day. Foreign language science is divided into four aspects (reading, spreading, listening and understanding). speaking) are divided, and separate concepts and skills are given for each of them. Educational technologies are productive of modern information technologies in the educational process is to use. Also, bringing modern innovative technologies to the educational process refers to improving the quality and efficiency of education through access. In particular, a foreign language some of the use of such information and communication technologies in learning there are advantages. The role of modern technology in language learning and teaching is incomparable. The use of technological tools affects every aspect of learning a foreign language (reading, listening comprehension and speaking).

Teaching and learning a foreign language using modern technologies is the most fruitful is one of the methods. In this process, including: - the student when using computers can watch and listen to foreign language videos, shows, dialogues, movies or cartoons; - foreign language radio broadcasts and television programs can be heard and watched; - a tape recorder, which is considered a more traditional method and use of cassettes; - CD players can be used. This is a technical tool use makes the process of

students learning a foreign language more interesting and effective ensures that. Today, schools teach through interactive games is becoming a tradition. It is known that the lesson is conducted on the basis of various games demonstrating students' abilities, concentration, knowledge and skills increases and ensures that they become strong. The basis of using game technology is an activity that activates and accelerates the student.

According to psychologists, psychological mechanisms of playful activity self-expression of a person, finding a stable place in life, self-management, self relies on fundamental needs to realize their potential. Any game it should be based on generally accepted educational principles and tactics. To educational games educational subjects should be taken as a basis. During the games, the student goes to a regular lesson he is more interested in this training and works freely. It should be noted that the game is, first of all, a method of teaching. Pupils to game lessons they participate with interest, strive to win, the teacher also provides education to the student through them. The student can speak and listen to English while playing games he believes that he can learn and write, he is interested. We know that he is currently in the process of education the student should be the subject. It is educational to focus more on interactive methods increases efficiency. One of the most important requirements for English language classes is to teach pupil to think independently.
