native language and literature teacher*

Abstract The article describes in detail the definition of the terms rights and freedom, types of freedom, types of legal actions, legal literacy, the history of legal norms, constitutional guarantees of freedom, as well as digital innovative methods of freedom integration in the field of rights and freedoms.

Keywords: Law, freedom, type, literacy, constitution, history, number, method, integration.

"Guaranteed right is a standard of life

Freedom is the host of endless possibilities."

Law is the key to freedom, freedom is an incomparable concept that does not choose distance or space. From time immemorial, remarkable works have been carried out in the society of individuals to fully know their rights, to create a theory of freedom and to implement it in every way: In particular, It is known that the family consisted of descendants, in which all the superiority was on the side of the woman, that is, the rights and freedoms of the gang or tribe were completely controlled by the mother. This is the history of rights and freedom evidence of its spread over many years.[2-22]

"In the new Uzbekistan, where human dignity is a great goal, law must be our supreme rule, freedom must be our noble value. As the head of our state Sh.M. Mirziyoyev emphasized, "Freedom must be implemented in every work, in every field". Right and freedom are twin concepts, because "right is a real blessing, freedom is a real interest." Law is a system of universally binding norms protected by the state at the level of the entire society. Human rights are a broad concept. In this case, it is called the ability to represent the civil rights and duties of a person.[1-136][1-137] Human rights are

characterized in different ways and have different contents. In particular, the rights and freedoms of citizens can be divided into four large groups. The first is personal rights and freedoms, Articles 25-35. Political rights and freedoms, Articles 36-40, economic and social rights, cultural rights and freedoms.

Freedom is the highest right given to a person and a value that cannot be taken away by anyone and is regularly protected by the state. Freedom is always alive, a symbol of constant balance in existence, our freedoms include: 1) life, 2) personal integrity, 3) protection from attacks on honor and reputation, 4) quality education, 5) freedom of religion and belief, 6) the right to quality medical care is an example. [35-37]

Freedom is a set of all the rights of a person, recognized by the state in law and strengthened in the constitution or other legal documents [3-37]. Citizens' rights and freedoms are one of the urgent issues of the state at all times. As an example, while going on an independent democratic path in Uzbekistan, the Republic of Uzbekistan is based on the principles of democracy and universal humanity in Chapter II, Article 13 of our updated constitution. According to him, the dignity and honor of a person is always protected by the state, as well as the establishment of a national center for human rights in the new Uzbekistan, as well as a council for human rights, gender equality, and the practice of preventing violence. important practical works have been carried out. Another important practice in the field of human rights and freedoms was the establishment of the Oliy Majlis representative body, the Ombudsman, in Uzbekistan.

Ombudsman was established in 1995. This organization fully fulfills a number of multi-functional important tasks, such as showing the way, the tools needed to protect the applicant's rights, complaints, and interests. Rights and freedom apply equally to individuals.[3-70]

In terms of rights and liberties, today's Renaissance continues at a rapid pace. In relation to freedoms, medals are established and awarded annually to representatives of various fields who perform the best in the field of law on the eve of the Human Rights and Freedoms Day on December 1.

A modern innovative formula in the education of law and freedom:

A-prompt delivery of populist decisions to the people, B-creating a questionnaire of freedoms and enriching it with people's opinions every week, C-establishing mobile control of rights guarantees in the justice system, D-easing the work of the electronic freedom system, E- I believe that we can strengthen our rights by gradually adapting the education on freedom for each section of our society and integrating only the most necessary legal literacy from the world legal market, and if we implement freedom through the integration bank of free proposals, our legal views will be more acquires modernity.

Only then will we take a new step towards improving E+H= modern well-being.

E+H+I=F

Conclusion

My conclusion is that freedom without rights, rights without freedom do not arise, do not develop, therefore, it is completely appropriate to continue the development of digital competitive legal reforms regarding human rights and freedoms.

- Effective use of visual and audio methods of demonstrations dedicated to the field of law and freedom.

- Increasing the number of official challenges on the topic of freedom and rights.

- To organize an educational competition called “I know my own rights” and to organize this competition every month between districts and neighborhoods, to create suitable conditions for the participation of all layers of the population, and for everyone to clearly demonstrate their talents.

- To organize “Freedom Day” and thus establish people’s freedom rights and level of knowledge, including: 1) State control over the organization of the Supreme Value Box and its complete placement in front of every village, village, house set off 5) Review this box on every Law Day, that is, explain the proposals for working with people’s organizations in the box, comparing them with world experience. 6) Organization of innovative digital legal hours. 7) Organization of rallies on the content of IT technologies and law will help to analyze the role of digital education in rights and digital literacy of citizens. Each of us is responsible every minute for the effective use of our rights, for

expanding our freedoms on a legal basis, because a good life begins with a guaranteed right. Article 25: “The right to life is an inalienable right of every human being” [4-17-25]
