IMPORTANCE OF TEACHING ENGLISH LANGUAGE IN PRIMARY SCHOOLS

Ubaydullayeva Khumora Oybekovna

teacher of English at the 6th school of Jomboy district, Samarkand region

Annotation. This article provides information on the methods and importance of teaching English to primary school students.

Key terms: stereotypes, teaching approaches, television, radio, shopping malls, entertainment venues.

Nowadays, there is more and more talk about the benefits of learning foreign languages early, especially English, which is a world language. Because television, radio, shopping malls, entertainment venues, educational institutions, no matter where you look, a word or a sentence in English can be seen. And it seems that learning English has become equally important for everyone. And it's extremely important to start this right from an early school age. Because of the psychological characteristics of young children it is no secret that learning to speak and read English is very easy. As a result, the advantages of this approach are obvious. Below we can see:

The psyche of children is not yet filled with stereotypes, which means that it will be easier for the child to get acquainted with the norms and values of foreign culture.

Children's communication, need for imitation, ability to accurately imitate sounds, words, and even entire phrases is simply incredible;

Young children have the ability to hear and see, a rapidly developing memory and thinking, which allows them to easily perceive and remember even difficult sounds and words in English.

One more advantages of teaching English language to students in primary schools they can get it easily on the next school levels without difficulties. According to Martin C. ideas children of primary age can effectively learn aspects of a foreign language; that

the teaching approaches must be appropriate to their age group; that continuity of foreign language into the secondary school is important and that the quality of the teaching must be high.

For teachers to contribute to solving these problems first of all they all need to have necessary computer knowledge and now how to use the hardware and software. For example, for transmitting a certain subject to computer technology, a teacher himself must have not only comprehensive understanding in this field of science but also know which element can be carried out for office equipment or didactic method and also he must be a good Methodist, have the ability to systematize the knowledge of information technology. In addition, a teacher must also be aware of technical devices and the software designed for the educational process.

Currently, two of software is being used on the practice of the use of information technology in education.

* Universal computer programs which addressed to solve a wide range of practical and scientific problems related to various areas.

* Specifically designed training programs for the educational process. Currently, not only the most common managing software programs, but also complex multimedia options are available.

According to the quality of these programs the participating of experts belonging to different areas as required for the development of informational technologies. But at the same time as a basis for teaching science, didactic and methodological components are distributed and placed in computer technology.

The software can be used as a database of traditional information and ticket information system data banks (including graphics, video and etc), computer programs as well as the organization of the educational process and management software.

We can conclude Learning English language is an important process in the development of a child's language, cognitive, cognitive and communicative skills; it allows him to broaden his worldview, to become acquainted with the language, people, and culture of another state; it highlights the official importance of English in both

primary school education and society.That's why the importance of teaching English language in primary schools has a great value.
