***Annotation.** This article presents a methodology for teaching English to elementary students, emphasizing the importance of creating a language-rich environment, incorporating interactive and multisensory activities, implementing task-based learning, using scaffolded instruction, integrating technology, and providing regular assessment and feedback. By following these strategies, educators can foster language acquisition, engagement, and proficiency among young learners.*

***Аннотация.** В этой статье представлена методика преподавания английского языка учащимся начальных классов, подчеркивающая важность создания языковой среды, включающей интерактивные и мультисенсорные занятия, обучение на основе задач, использование структурированного обучения, интеграцию технологий и регулярную оценку и обратную связь. Следуя этим стратегиям, педагоги могут способствовать овладению языком, вовлечению и повышению уровня владения им молодых учащихся.*

***Annotatsiya.** Ushbu maqolada boshlang'ich talabalarga ingliz tilini o'rgatish, tilga boy muhit yaratish, interaktiv va multisensorli faoliyatni o'z ichiga olish, vazifalarga asoslangan ta'limni amalga oshirish, iskala ko'rsatmalaridan foydalanish, texnologiyani birlashtirish va muntazam baholash va fikr-mulohazalarni taqdim etish muhimligini ta'kidlaydigan metodologiya keltirilgan.*

Ushbu strategiyalarga rioya qilish orqali o'qituvchilar yosh o'quvchilar o'rtasida tilni o'rganish, jalb qilish va malakasini oshirishlari mumkin.

Keywords: *English language learning, elementary education, language-rich environment, interactive activities, multisensory learning, task-based learning, scaffolded instruction, technology integration, assessment, feedback, language acquisition, engagement, proficiency.*

Ключевые слова: *Изучение английского языка, начальное образование, богатая языками среда, интерактивные занятия, мультисенсорное обучение, обучение на основе задач, комплексное обучение, интеграция технологий, оценка, обратная связь, овладение языком, вовлеченность, уровень владения языком.*

Kalit so'zlar: *Ingliz tilini o'rganish, boshlang'ich ta'lim, tilga boy muhit, interaktiv faoliyat, multisensorli ta'lim, vazifalarga asoslangan ta'lim, iskala o'qitish, texnologiya integratsiyasi, baholash, fikr-mulohaza, tilni o'zlashtirish, jalb qilish, malaka.*

Introduction:

English is a globally recognized language that plays a vital role in communication, education, and career opportunities. As the world becomes increasingly interconnected, the importance of mastering English from an early age cannot be overstated. Implementing an effective methodology for learning English in elementary education sets a strong foundation for language skills development. This article presents a comprehensive approach to teaching English to young learners, focusing on key strategies and techniques that promote engagement, proficiency, and enjoyment.

Incorporating English into the daily classroom environment encourages students to interact with the language naturally. Labeling objects, displaying posters

with key vocabulary, and using English in classroom instructions foster language acquisition through immersion. Additionally, creating opportunities for students to engage in English conversations with their peers and teachers promotes fluency and enhances their confidence in using the language.[5]

Engaging young learners through interactive and multisensory activities is crucial for maintaining their interest and facilitating language acquisition. Utilize games, songs, role-plays, and storytelling to make the learning experience enjoyable and memorable. These activities stimulate various senses, such as listening, speaking, and even movement, which enhances comprehension and retention of English vocabulary and grammar structures.[2]

Integrating task-based learning into the English curriculum allows students to apply their language skills to real-world situations. Design activities that require students to complete a task, such as planning a class party, writing a short story, or conducting a simple interview. This methodology promotes critical thinking, collaboration, and problem-solving skills while providing authentic contexts for language use.[3]

Breaking down language concepts into smaller, manageable parts helps elementary students grasp English more effectively. Use a step-by-step approach, starting with simple vocabulary and gradually introducing more complex grammar structures. Provide clear explanations, visual aids, and examples to support students' understanding. Regular practice and reinforcement ensure that students consolidate their knowledge and skills over time. The integration of technology in English language learning can enhance engagement and provide additional resources for practice. Utilize interactive educational apps, language learning websites, and multimedia resources that offer interactive exercises, pronunciation practice, and authentic language materials. Encourage students to use technology for independent learning, allowing them to explore English outside the classroom.[1]

Regular assessment is essential for monitoring students' progress and identifying areas that require additional support. Use a variety of assessment methods, such as quizzes, oral presentations, and project-based assessments, to

evaluate students' language proficiency. Provide constructive feedback that highlights their strengths and areas for improvement, encouraging self-reflection and growth.[15]

Conclusion

An effective methodology for learning English in elementary education lays the foundation for language skills development and fosters a lifelong love for language learning. By creating a language-rich environment, incorporating interactive and multisensory activities, implementing task-based learning, using scaffolded instruction, integrating technology, and providing regular assessment and feedback, educators can empower young learners to become confident and proficient English speakers. Remember, learning English should be an enjoyable and meaningful experience that equips students with the necessary skills for success in an increasingly interconnected world.
